AUTO SAFETY HOUSE CHOSEN FOR ADEQ EMISSION REDUCTION PROGRAM

PHOENIX, AZ, August 29, 2008 – Auto Safety House (ASH) has been chosen as the primary contractor for an ADEQ (Arizona Department of Environmental Quality) diesel emissions reduction program for the Nogales area located on the Arizona-Mexico border.

“Auto Safety House is excited to be part of this project, which is being funded by the U.S. Environmental Protection Agency. The program will equip about 30 diesel trucks with devices to reduce particulate matter air pollution from diesel emissions by 20 to 30 percent. This program is a continuation of our effort to offer fleet owners vehicle emission solutions that not only enable them to comply with EPA standards, but also reduce their impact on the environment. This program is also part of our growing commitment to our own sustainability initiative. We continue to provide fleet owners and operators with sustainability solutions for their fleet vehicles, equipment, and service/repair facilities.” commented Rudy Garcia – Vice President of Sales & Marketing of Auto Safety House.

Auto Safety House (ASH) is a distributor of new and used buses, truck equipment, bus, truck and trailer parts, and also performs emergency vehicle modifications, and offers a diverse mix of heavy duty mechanical service in facilities located throughout the Southwestern United States.

Truck Equipment

New & Used Buses

E.V. Modifying

Trailer Parts
